US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Age Group is calculated based upon age at the end of the reporting period. Child Adolescent services are provided for individuals through age 18. This differs from the federal age cohort. The SMHA is currently working on refining data collection regarding ethnicity. "Residential Care" does not include individuals receiving supported housing services. Individuals receiving supported housing services are included under "Private Residence". The SMHA does not provide crisis residence services and adult fostercare. Information for these services provided offered through different agencies is not presently collected in the Mental Health Information System (MHIS). The SMHA does not provide "traditional" fostercare for children and adolescents and does not presently collect this data in the MHIS. The Department of Social Services provides fostercare for this population. The SMHA does offer therapeutic fostercare as part of a spectrum of services for children and adolescents, but it is not currently maintained as a discrete data element in the MHIS. Per instructions, a total count of 2230 individuals with a reported category of "Other Race" , have been included in the category "Race Not Available".
